

# Science of Industry 4.0

**Global Products and  
Services at your doorstep.**

- Robotics Solutions
- Integration Services
- Digital Machining
- Machining Insights
- Data Analytics
- Predictive Maintenance
- Artificial Intelligence
- Machine Learning
- Machine Vision
- Visual Inspection Automation

***Explore the future of manufacturing !***

Society's rapid digitalization brings opportunities for the manufacturing industry to overcome challenges, minimize waste of resources, time and data - ultimately becoming more profitable. Explore the future of manufacturing - with the leaders.

**AHMEDABAD**

**VADODARA**

**SURAT**

# Assembling the future.

## Products & Services include:

- Machine Tending
- Pick and Place
- Palletizing
- Deburring
- Painting
- ARC & SPOT Welding
- Injection Moulding

## **The perfect solutions for your assembly challenges.**

We design and integrate innovative cost-effective robotic solutions for complicated applications to everyday tasks. From small stand-alone systems to large integrated processes, we provide custom robotic and automation systems for industries of all types. As a turnkey solutions provider, we have been successfully helping many of the leading manufactures to reduce operating costs and improve long term sustainability. Our experienced in house team of engineers evaluate the specialized needs of your application, while integrating the latest technologies to work with it.

# Powering Reliability

## Products & Services include:

Data Analytics

Triaxial Vibration Analytics

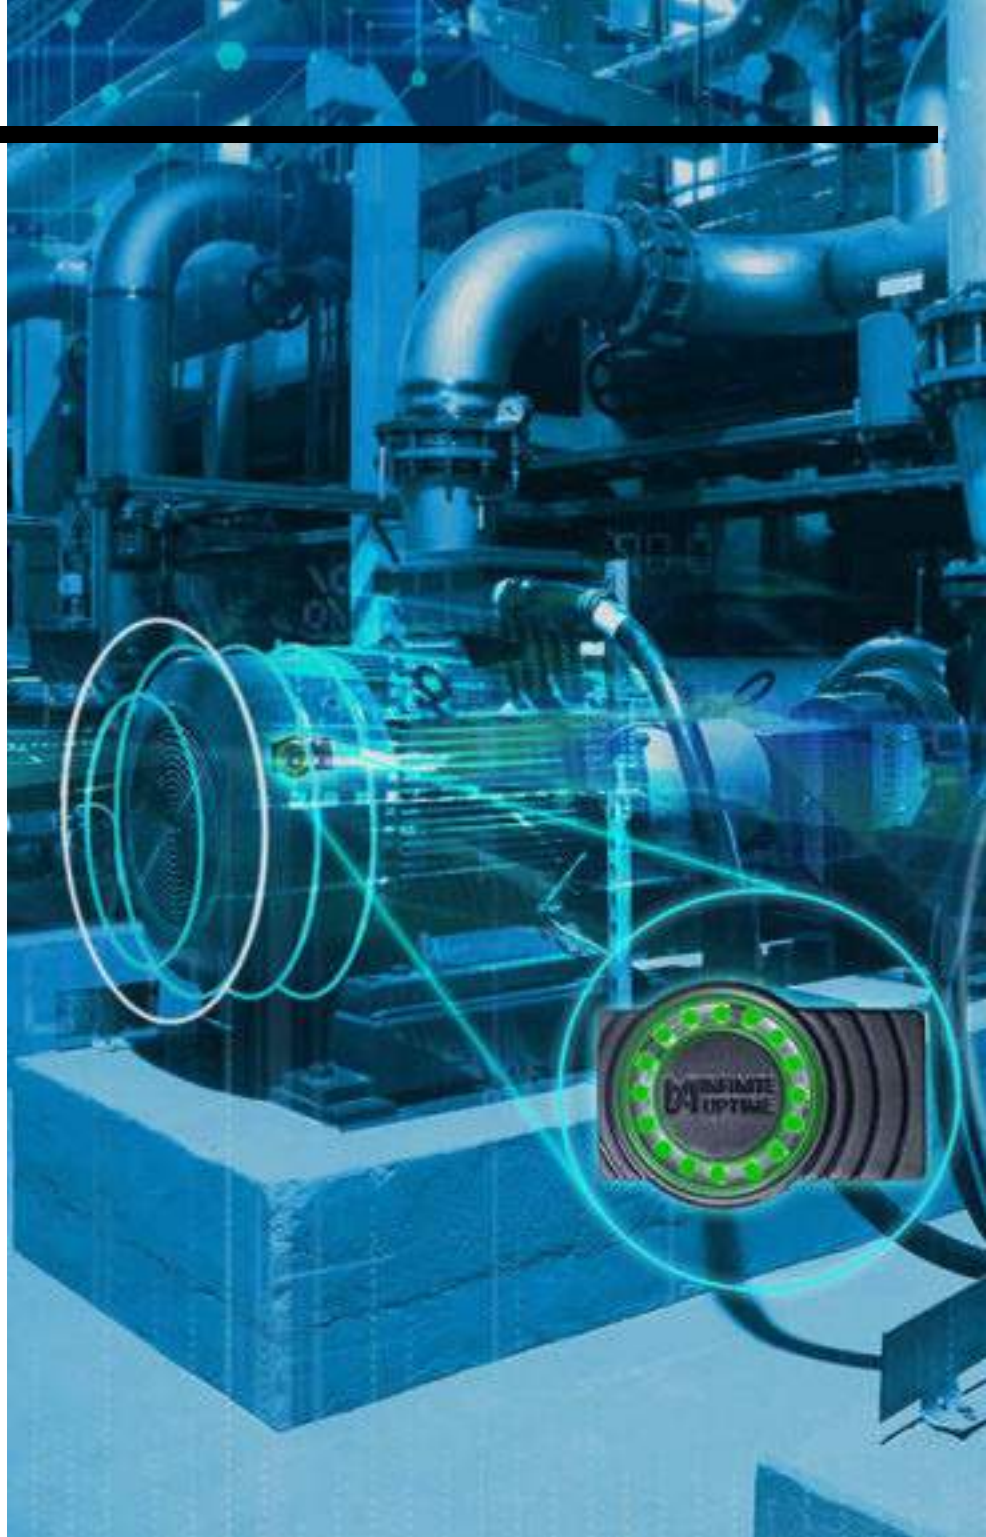

Acoustic Analysis

Spectral Analyses

Configurable Edge Diagnostics

Predictive Maintenance

AMC Support

## **Committed to Infinite Uptime of your critical machineries.**

Vertically integrated, Infinite Uptime manufactures and supplies Smart Edge devices along with Connectivity, Communication, Software Analytics, Dashboarding and reporting in order to provide a complete solution to its customers.

Monitors, motors, bearings, and other critical mechanical rotating parts at real time.

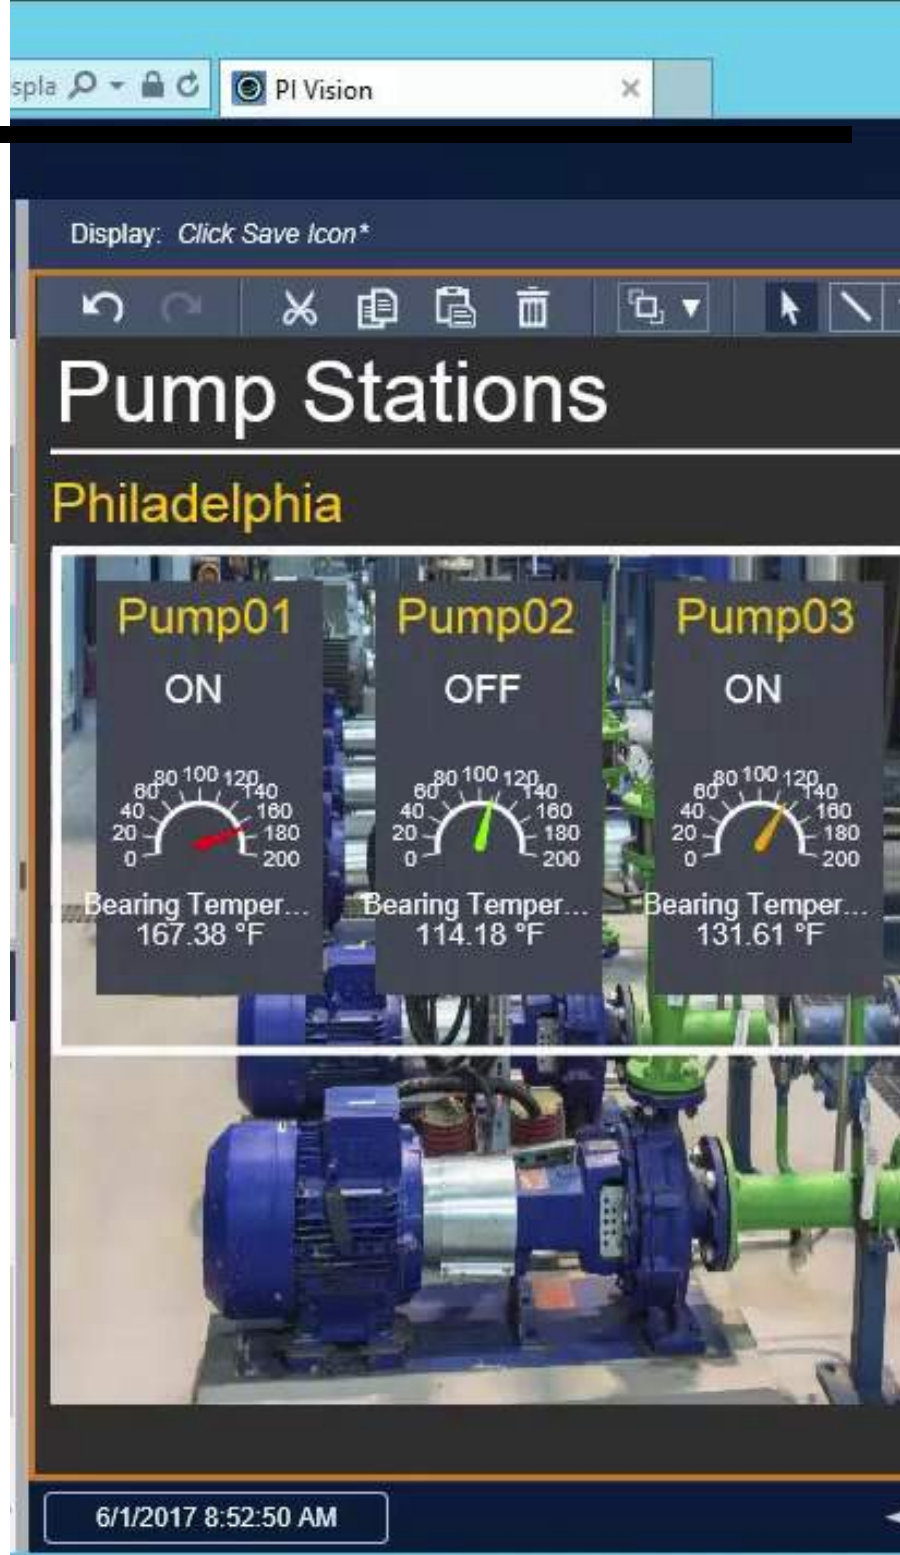

# Creating Value.

## Products & Services include:

- Data Historians
- Data Analytics
- Asset Frameworks and Analytics
- Machine Downtime Analytics
- Triggers and Alarms
- Predictive Asset Maintenance
- Industrial IoT & Smart Machines
- Real Time Condition Monitoring

## Enabling VALUE in your digital transformation

In already optimized processes it may be challenging to find room for further improvement. The solution can be found in the advanced software and tools that support your digital manufacturing, all the way from planning and design to production and manufacturing analysis.

We enable customers to come out of their existing legacy systems through emerging and disruptive technologies. We assist our clients on their business workflow to provide integrated solutions using right mix of technology on open source platforms.

# Intelligent Machine Vision.

## Products & Services include:

- Next Gen Visual Inspection
- AI & ML based Machine Vision
- Analytics & Dashboards
- Integration Services
- Commissioning Support
- AMC Support

## Next Generation Artificial Intelligence & Machine Learning based Machine Vision

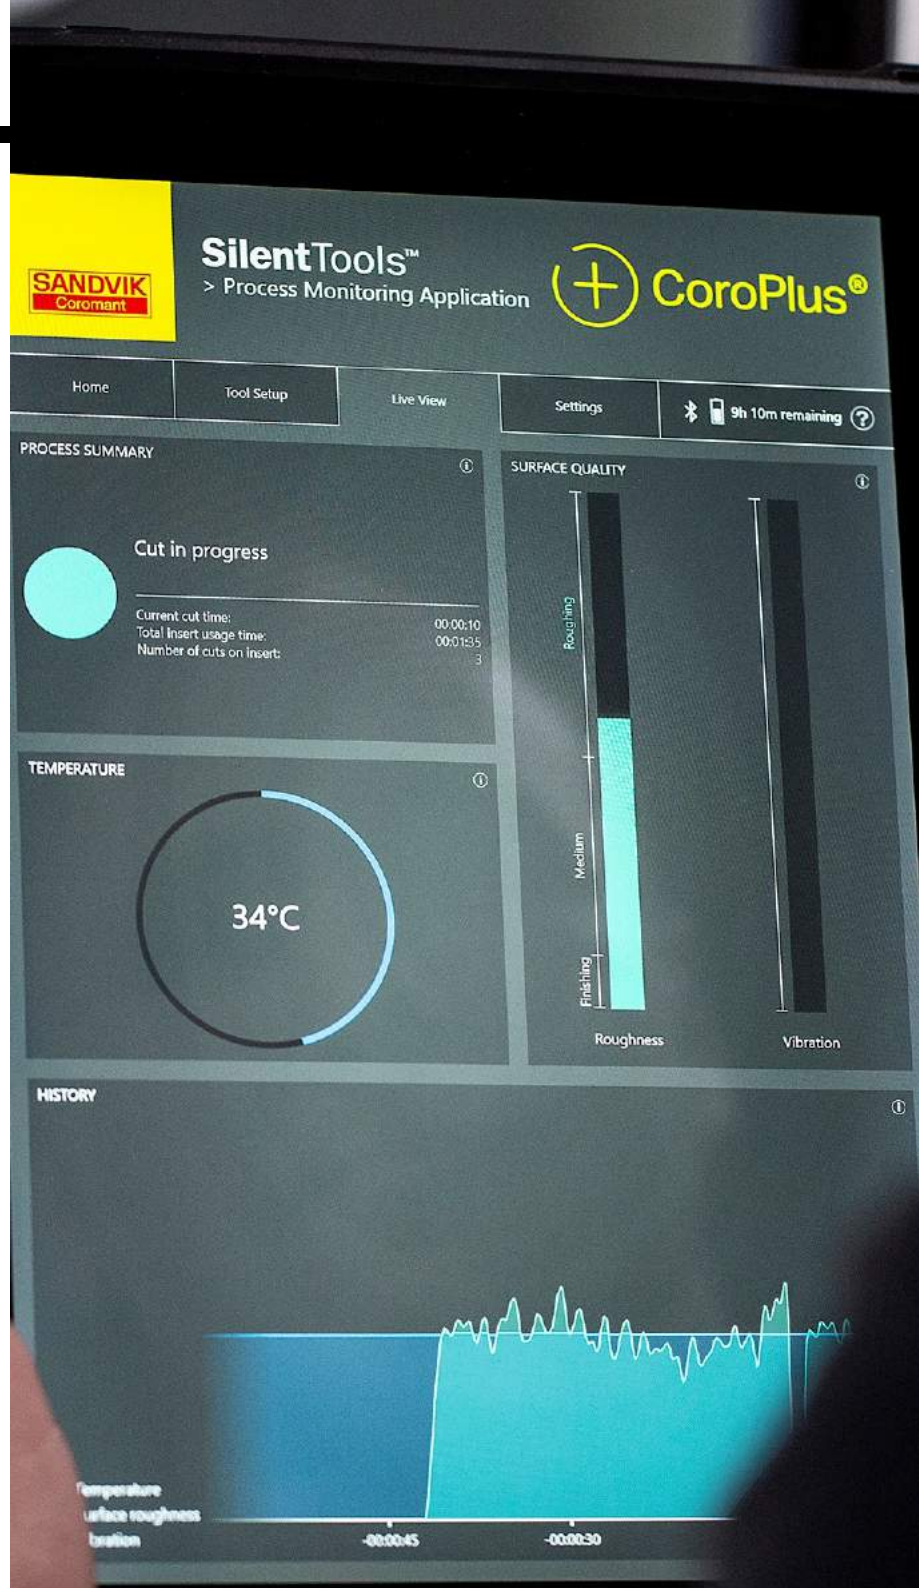

The #1 business challenge that manufacturers identify where smart factory solutions can enhance business performance is Quality Management. At Lincode, we help manufacturers identify and eliminate product defects using computer vision and Artificial Intelligence. Being robust and a powerful solution that can capture surface defects accurately, no matter what the orientation of the product is to be, we truly can offer the next generation of visual inspection technologies that help you actually stop chasing the false positives.

# Shaping the future.

## Products & Services include:

- Training & Productivity Improvement
- Digital Machining - Industry 4.0
- Machining Insights - Industry 4.0
- Real Time Dashboards
- Collision & Tool Breakage Detection
- Contact & Tool Wear Detection
- Process Monitoring Applications
- Connected Machines Dashboards

**Tools for faster Payback - We don't just cut your metal, we also cut your payback time.**

Engineering: It's the lifeblood of society. Developing, changing, molding and evolving our everyday lives. In a world where we see increased prosperity, population growth and rising consumption speeds; challenges will arise for economic growth and sustainability in equal measure. Simply said, the speed of change will never be this slow again. New opportunity awaits, we are entering the future of manufacturing and we want you to join us. Are you coming?

# SALES & SERVICE

**JAMNAGAR | RAJKOT | AHMEDABAD,  
VADODARA | SURAT | MUMBAI**

From assembly solutions, abrasive solutions, electrical solutions to adhesives and coatings, mechanical and civil protection to lubrication, metal working oils and tools to fluid handling solutions, we're there with the technology and innovation to keep you and your machines moving. Because we know the speed of change will never be this slow ever again.
